1 [Applications and OS: Wireless sensor networks for habitat monitoring](#)

Alan Mainwaring, David Culler, Joseph Polastre, Robert Szewczyk, John Anderson

September 2002 **Proceedings of the 1st ACM international workshop on Wireless sensor networks and applications**

Publisher: ACM Press

Full text available: [pdf\(542.04 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

We provide an in-depth study of applying wireless sensor networks to real-world habitat monitoring. A set of design requirements are developed that cover the hardware design of the nodes, the design of the sensor network and the capabilities for remote data access and management. A system architecture is proposed to address the requirements for habitat monitoring in general, and an instance of the architecture for monitoring seabird nest environment and behavior is presented. The cu ...

Keywords: environmental monitoring, habitat monitoring, low power systems, sensor network architecture, wireless sensor networks

2 [Trunking of TDM and narrowband services over IP Networks](#)

James Aweya

January 2003 **International Journal of Network Management**, Volume 13 Issue 1

Publisher: John Wiley & Sons, Inc.

Full text available: [pdf\(418.58 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

The recent interest in IP as the vehicle for transporting TDM and narrowband services stems from the possibility of using a common transport network for voice, video, and data, and the flexibility with which new services can be introduced. A key step in the evolution of networks towards a 'broadband' IP-based environment is the 'graceful' interworking of the IP networks with the existing networks and services, particularly with the circuit switched telephone network. A &l ...

3 [Secure wireless protocols: An authentication framework for hierarchical ad hoc sensor networks](#)

Mathias Bohge, Wade Trappe

September 2003 **Proceedings of the 2003 ACM workshop on Wireless security**

Publisher: ACM Press

Full text available: [pdf\(263.78 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Recent results indicate scalability problems for flat ad hoc networks. To address the issue of scalability, self-organizing hierarchical ad hoc architectures are being investigated. In this paper, we explore the task of providing

data and entity authentication for hierarchical ad hoc sensor networks. Our sensor network consists of three tiers of devices with varying levels of computational and communication capabilities. Our lowest tier consists of computationally constrained sensors that are unable to ...

Keywords: TESLA, ad hoc networks, authentication, handoff

4 Systems II: An analysis of a large scale habitat monitoring application

Robert Szewczyk, Alan Mainwaring, Joseph Polastre, John Anderson, David Culler

November 2004 **Proceedings of the 2nd international conference on Embedded networked sensor systems**

Publisher: ACM Press

Full text available: pdf(1.22 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Habitat and environmental monitoring is a driving application for wireless sensor networks. We present an analysis of data from a second generation sensor networks deployed during the summer and autumn of 2003. During a 4 month deployment, these networks, consisting of 150 devices, produced unique datasets for both systems and biological analysis. This paper focuses on nodal and network performance, with an emphasis on lifetime, reliability, and both static and dynamic aspects of single and multi-hop networks.

Keywords: application analysis, habitat monitoring, implementation, long-lived systems, microclimate monitoring, network architecture, sensor networks

5 Notable computer networks

John S. Quarterman, Josiah C. Hoskins

October 1986 **Communications of the ACM**, Volume 29 Issue 10

Publisher: ACM Press

Full text available: pdf(4.66 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#), [review](#)

Computer networks are becoming more numerous and more diverse. Collectively, they constitute a worldwide metanetwork.

6 Local networks

William Stallings

March 1984 **ACM Computing Surveys (CSUR)**, Volume 16 Issue 1

Publisher: ACM Press

Full text available: pdf(3.01 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#), [review](#)

The rapidly evolving field of local network technology has produced a steady stream of local network products in recent years. The IEEE 802 standards that are now taking shape, because of their complexity, do little to narrow the range of alternative technical approaches and at the same time encourage more vendors into the field. The purpose of this paper is to present a systematic, organized overview of the alternative architectures for and design approaches to local networks.

...

7 International standards for data communications: A status report

Ira W. Cotton, Harold C. Folts

September 1977 **Proceedings of the fifth symposium on Data communications**

Publisher: ACM Press

Full text available: pdf(1.13 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Recent developments in data communications standards have been patterned on a hierarchical approach to communications system architecture. A number of independent levels have been identified, and standards development has proceeded at its own pace within each level. These levels are identified and recent progress in standardization is discussed for each.

8 Mobile wireless network system simulation

 Joel Short, Rajive Bagrodia, Leonard Kleinrock
December 1995 **Proceedings of the 1st annual international conference on Mobile computing and network**
Publisher: ACM Press
Full text available:  [pdf\(1.63 MB\)](#) Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

9 An integration of network communication with workstation architecture

 Gregory G. Finn
October 1991 **ACM SIGCOMM Computer Communication Review**, Volume 21 Issue 5
Publisher: ACM Press
Full text available:  [pdf\(771.35 KB\)](#) Additional Information: [full citation](#), [abstract](#), [citations](#), [index terms](#)

A workstation may be thought of as a group of cooperatively connected subsystems. Point-to-point channels be used to create a small-scale Gigabit LAN to which these subsystems are attached as nodes. The architecture focus of such a workstation shifts towards its internal LAN. An attractive attribute of this LAN is that its aggregate capacity scales linearly with the number of nodes attached to it. If the link-layer of the internal LAN is made equivalent to the link-layer of the external ...

10 Mobile wireless network system simulation

Joel Short, Rajive Bagrodia, Leonard Kleinrock
December 1995 **Wireless Networks**, Volume 1 Issue 4
Publisher: Kluwer Academic Publishers
Full text available:  [pdf\(1.70 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#)

This paper describes an advanced simulation environment which is used to examine, validate, and predict the performance of mobile wireless network systems. This simulation environment overcomes many of the limitations found with analytical models, experimentation, and other commercial network simulators available on the market today. We identify a set of components which make up mobile wireless systems and describe a set of flexible models which can be used to model the various components ...

11 Communications networks for the force XXI digitized battlefield

Paul Sass
October 1999 **Mobile Networks and Applications**, Volume 4 Issue 3
Publisher: Kluwer Academic Publishers
Full text available:  [pdf\(745.29 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

In striving to meet the increasing demands for timely delivery of multimedia information to the warfighter of the 21st Century, the US Army is undergoing a gradual evolution from its "legacy" communications networks to a flexible internetwork architecture based solidly on the underlying communications protocols and technology of the commercial Internet. The framework for this new digitized battlefield, as described in the DoD's Joint Technical Architecture, is taken from the ...

12 Platforms: Bluetooth and sensor networks: a reality check

 Martin Leopold, Mads Bondo Dydenborg, Philippe Bonnet
November 2003 **Proceedings of the 1st international conference on Embedded networked sensor system**
Publisher: ACM Press
Full text available:  [pdf\(356.11 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

The current generation of sensor nodes rely on commodity components. The choice of the radio is particularly important as it impacts not only energy consumption but also software design (e.g., network self-assembly, multi-hop routing and in-network processing). Bluetooth is one of the most popular commodity radios for wireless device representative of the frequency hopping spread spectrum radios, it is a natural alternative to broadcast radios in the context of sensor networks. The question ...

Keywords: bluetooth, mac layer, network self-assembly, sensor nodes

13 Security: Ariadne: a secure on-demand routing protocol for ad hoc networks

 Yih-Chun Hu, Adrian Perrig, David B. Johnson
September 2002 **Proceedings of the 8th annual international conference on Mobile computing and network**

Publisher: ACM Press

Full text available:  [pdf\(308.15 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

a secure on-demand routing protocol for ad hoc networks.

Keywords: ad hoc network routing, routing, security

14 Mobile networking in the Internet

Charles E. Perkins

December 1998 **Mobile Networks and Applications**, Volume 3 Issue 4

Publisher: Kluwer Academic Publishers

Full text available:  [pdf\(166.90 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Computers capable of attaching to the Internet from many places are likely to grow in popularity until they dominate the population of the Internet. Consequently, protocol research has shifted into high gear to develop appropriate network protocols for supporting mobility. This introductory article attempts to outline some of the many promising and interesting research directions. The papers in this special issue indicate the diversity of viewpoints within the research community, and it is ...

15 Fast detection of communication patterns in distributed executions

Thomas Kunz, Michiel F. H. Seuren

November 1997 **Proceedings of the 1997 conference of the Centre for Advanced Studies on Collaborative research**

Publisher: IBM Press

Full text available:  [pdf\(4.21 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Understanding distributed applications is a tedious and difficult task. Visualizations based on process-time diagrams are often used to obtain a better understanding of the execution of the application. The visualization tool we use, Poet, an event tracer developed at the University of Waterloo. However, these diagrams are often very complex and do not provide the user with the desired overview of the application. In our experience, such tools display repeated occurrences of non-trivial communication ...

16 The use of message-based multicomputer components to construct gigabit networks

 Danny Cohen, Gregory G. Finn, Robert Felderman, Annette DeSchon

July 1993 **ACM SIGCOMM Computer Communication Review**, Volume 23 Issue 3

Publisher: ACM Press

Full text available:  [pdf\(1.13 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [index terms](#)

The typical node of a message-based multicomputer consists of a microprocessor, router and memory. At the California Institute of Technology, the Mosaic project has integrated such a node onto a single chip. That reduction in scale fundamentally changes the scope of node application, since nodes become both very small, and inexpensive. Mosaic nodes may be employed to process, to generate, or to receive data. Since the router in a Mosaic node is independent of the microprocessor, computation and routing ...

17 Hierarchically-organized, multihop mobile wireless networks for quality-of-service support

Ram Ramanathan, Martha Steenstrup

June 1998 **Mobile Networks and Applications**, Volume 3 Issue 1

Publisher: Kluwer Academic Publishers

Full text available:  [pdf\(429.81 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

MMWN is a modular system of adaptive link- and network-layer algorithms that provides a foundation on which build mechanisms for quality-of-service provision in large, multihop mobile wireless networks. Such networks : practical means for creating a communications infrastructure where none yet exists or where the previously ex infrastructure has been severely damaged. These networks provide communications for such diverse purposes tactical maneuvering and strategic planning ...

18 [Encryption and Secure Computer Networks](#)

 Gerald J. Popek, Charles S. Kline
December 1979 **ACM Computing Surveys (CSUR)**, Volume 11 Issue 4

Publisher: ACM Press

Full text available:  [pdf\(2.50 MB\)](#)

Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

19 [Performance and scalability of mobile wireless base-station-oriented networks](#)

 Stuart D. Milner, Sohil Thakkar, Karthikeyan Chandrashekar, Wei-Lun Chen
April 2003 **ACM SIGMOBILE Mobile Computing and Communications Review**, Volume 7 Issue 2

Publisher: ACM Press

Full text available:  [pdf\(1.10 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#)

This paper focuses on the performance and scalability of mobile, base-station-oriented wireless networks, whic been the subject of research and development projects sponsored by the Defense Advanced Research Projects Agency. The background and rationale for such networks is presented as well as performance and scalability a of their routing, mobility, and quality of service models. Using systems-oriented, large-scale discrete event simulation, both performance scalability and comple ...

20 [Mobile connectivity protocols and throughput measurements in the Ricochet Microcellular data network \(MCDN\) system](#)

 Mike Ritter, Robert J. Friday, Rodrigo Garces, Weill San Filippo, Cuong-Thinh Nguyen
July 2001 **Proceedings of the 7th annual international conference on Mobile computing and network**

Publisher: ACM Press

Full text available:  [pdf\(178.43 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

We describe the protocols implemented in the Ricochet MCDN system to provide continuous connectivity to mc users traveling up to 70 mph. These protocols are general in nature for any frequency-hopping microcell-based system, particularly those that follow the FCC part 15.247 rules [9] and operate in unlicensed spectrum. We al present throughput measurements as a function of velocity and describe a model to predict those numbers ba upon the protocols implemented. The MCDN system is a ...
